PRODUCT DESCRIPTION

Enclosure to house transformer. Has separate compartments for transformer, line and low voltage wiring. Allows the line voltage connection to be located in a separate compartment. Holds one EN-12100-R-AR, EN-12150-R-AR or EN-24150-R-AR electronic transformer.

FEATURES

- Use for all initial installations to ensure safe and primary side connections in a wiring compartment

SPECIFICATIONS

Construction: One compartment houses the transformer, another is provided for line volt wire connections and the third for secondary connections. The box has standard size knock outs for BX or non-metallic sheathed cable connectors.

Knockouts: 6 total - 2 on dual compartment side (one for each compartment), 4 (2 on each side) on the short side of transformer side of box. One full sized and one small knockout.

Details: Has well placed screw holes that can be used as primary mounting locations when the enclosure is going to be mounted on a vertical surface.
