INSTRUCTIONS: Low Voltage Surface Mounts ME-Fixtures

CAUTION:

Always turn off power at fuse box prior to installation to prevent electrical shock. For installation by a qualified electrician.

Line voltage wire must be 12awg BX or Romex wire.

Install over a standard 4 inch junction box.

All wires must be contained in the junction box.

TO HARD WIRE:

- Loosen the three canopy screws twist and separate the canopy cover from the base plate.
- 2. Remove knock out from the base plate.
- Guide the white and black wires from the transformer through the knock out in the base plate and into the Junction box.
- 4. Connect with like colored line volt wires from the junction box to transformer wires, with wire nuts (supplied).
- 5. Connect green grounding wire from junction box (may be bare copper wire) to green wire from fixture.
- 6. Attach the base plate to a junction box using slotted holes.
- 7. Mount the canopy to the base plate by twisting key holes over three screws in base plate.
- 8. Tighten screws to secure canopy.
